Materials Handling & Packaging Engineering
Douglas Aircraft Company
3855 Lakewood Boulevard
Long Beach, California 90846

*DPM 3080
Adhesive, Quick Set*

Dear Mr. Veneroso:

Your letter of March 24, 1977, to our Los Angeles office has been forwarded to my attention.

The Hazardous Materials Regulations of the Department of Transportation are contained in 49CFR100-199. Eastman 910 adhesive was found to be subject to these regulations and classified as an "ORM-A" material when tested by us.

In addition to the DOT regulations, air shipments of Eastman 910 adhesive must meet the requirements of the International Air Transport Association's Restricted Article Regulation for international shipments and the Official Air Transport's Restricted Article Tariff No. 6D for domestic shipments. We suggest that you obtain a copy of the publications.

We have also enclosed, per your request, a copy of the Material Safety Data Sheet for Eastman 910 adhesive.

This information is furnished free of charge on the condition that neither Eastman Kodak Company nor its subsidiaries shall be responsible for the use of such information. We suggest that you make your own determination as to the suitability and the completeness of this information for your use and for the safety and health of your employees and your customers.

Yours very truly,

EASTMAN CHEMICAL PRODUCTS, INC.

Ms. Gail T. Cross
